

# SUHAILA

Front-End Developer

Dubai, UAE (Open to Remote) • +971 561014966 • suhailasadam1@gmail.com • No Sponsorship Required

## PROFILE SUMMARY

---

Front-end and mobile app developer with hands-on project experience building responsive, cross-platform interfaces and mobile applications using Flutter/Dart, REST APIs, and HTML, CSS, and JavaScript. Experienced working independently and self-directing a full project build end-to-end — from UI design through integration and deployment — along with collaborating with UI/UX and development teams to improve usability. Comfortable with Git version control, collaborative development workflows, and asynchronous communication. BSc in Computer Science with strong fundamentals in object-oriented programming, debugging, and attention to detail. Seeking a Remote Junior Front-End / App Developer role on a product or mobile engineering team.

## TECHNICAL SKILLS

---

- Languages & Markup: JavaScript, HTML, CSS, Dart, Java, C, C++
- Frameworks & Tools: Flutter (proficient — cross-platform mobile app development); React Native, Kotlin, Swift (foundational, in progress); Git version control; familiar with Agile/collaborative team workflows; app packaging & deployment basics
- Core Concepts: REST API integration; exposure to Firebase and third-party API integrations; designing, developing, and maintaining responsive UI for mobile and web applications; optimizing apps for performance and scalability; object-oriented programming; UI component reusability; debugging; cross-browser & cross-device compatibility; problem-solving mindset and strong attention to detail
- Currently expanding into: React (component-based, API-driven interfaces), React Native, Firebase for mobile backend integration, and staying current with the latest front-end/mobile technologies; experienced collaborating with UI/UX and development teammates on shared builds

## PROJECTS

---

### Movie & TV Show Search App

2026 (In Progress)

*Self-directed learning project | Tech: React, JavaScript, REST API*

- Building a React app that searches movies/TV shows via a live public API, rendering results as reusable card components.
- Implementing debounced search input, loading/empty/error states, and responsive grid layout.
- Used to build hands-on React fundamentals: component structure, state management with hooks, and API data fetching.

### Netflix Clone Website

Sep 2025 – Oct 2025

*Self-directed project | Tech: HTML, CSS, JavaScript*

- Built a responsive, Netflix-inspired web application from scratch, including homepage, navigation bar, banners, and movie sections.
- Implemented layouts that adapt cleanly across desktop, tablet, and mobile breakpoints.
- Used modern CSS styling and JavaScript interactivity to improve the overall user experience.

### Taxi Booking App

Mar 2022 – Apr 2022

*Final year project | Tech: Flutter, Dart*

- Developed a cross-platform taxi booking application front-end using Flutter and Dart.
- Designed responsive UI screens for ride booking and account management.
- Built login, registration, ride booking, payment, and trip history screens/modules.
- Created reusable UI components to improve maintainability and scalability, and collaborated with UI/UX and development teammates to integrate features, improve usability, and prepare the app for deployment.

## EDUCATION

---

### B.Sc. Computer Science, Bharathidasan University

2019 – 2022

CGPA: 8.74 / 10

## ACHIEVEMENTS

---

- Secured 2nd Rank in department and received the Silver Medal for outstanding academic performance.
- Selected through campus placement, demonstrating strong technical and communication skills.

- Worked as a Primary Teacher for 2 years, building presentation, mentoring, and problem-solving skills valuable in a frontend/collaborative engineering role.

## **SOFT SKILLS**

---

- Strong communication skills to collaborate with designers, developers, and clients.
- Problem-solving mindset and strong attention to detail for debugging UI issues and improving user experience.
- Teamwork and adaptability in fast-paced development environments.
- Self-motivated and organized — independently planned and delivered a full project build (Netflix Clone Website) without day-to-day supervision.
